^a PA # corresponds to the codes provided in Figure 1a.

^b N refers to the number of plots, S to the observed richness, and E to the total number of endemic species (Ei+Ea) in each PA.

^c Landscape is abbreviated as follows: northern mountain chain (N), southern mountain chain (S), and littoral (L).

^d Vegetation type is abbreviated as follows: scrubland (Sc), pine forest (Pi), mixed forest (Mi), cork oak forest (Co), olive trees (Ol), dune (Du), and pasture (Pa).

^e Altitude refers to the mean altitude of the plots (m).
