Habitat and landscape factors influence pollinators in a tropical megacity, Bangkok, Thailand

Supplemental Figure S1. Maps of the study area.
Supplemental Figure S1a. A map of Bangkok, Thailand, showing all 52 green areas used in the study.
Supplemental Figure S1b. Representative samples of how we measured percent vegetation surrounding each plot within 5 concentric circles (yellow, 100 m; green, 350 m; purple, 650 m; blue, 1,050 m; and pink 1,550 m radiuses). Top to bottom: (A) Suan Wachirabenchatat, (B) Wat Pathum Wanaram and Suan Lumpini, (C) Suan Sri Nakhon Khuean Khan (left) and School Sumran Wittaya (right), and (D) Dusit Zoo and Dusit Golf Course.
