

Table S3. One-sample t-tests of linear regression t-values

	<i>t</i> (31)	<i>p</i>	95% confidence interval
Plausibility	-1.73	.094	[-0.77; 0.06]
Possibility	0.60	.553	[-0.28; 0.51]
Word length	3.25	.003*	[0.19; 0.81]
Word frequency	-0.54	.595	[-0.45; 0.26]
Orthographic neighborhood size	1.62	.115	[-0.08; 0.67]

* Significant after Bonferroni adjustment ($\alpha_{\text{boncor}} < 0.01$)
