

Figure S1

Zhao et al. 2018

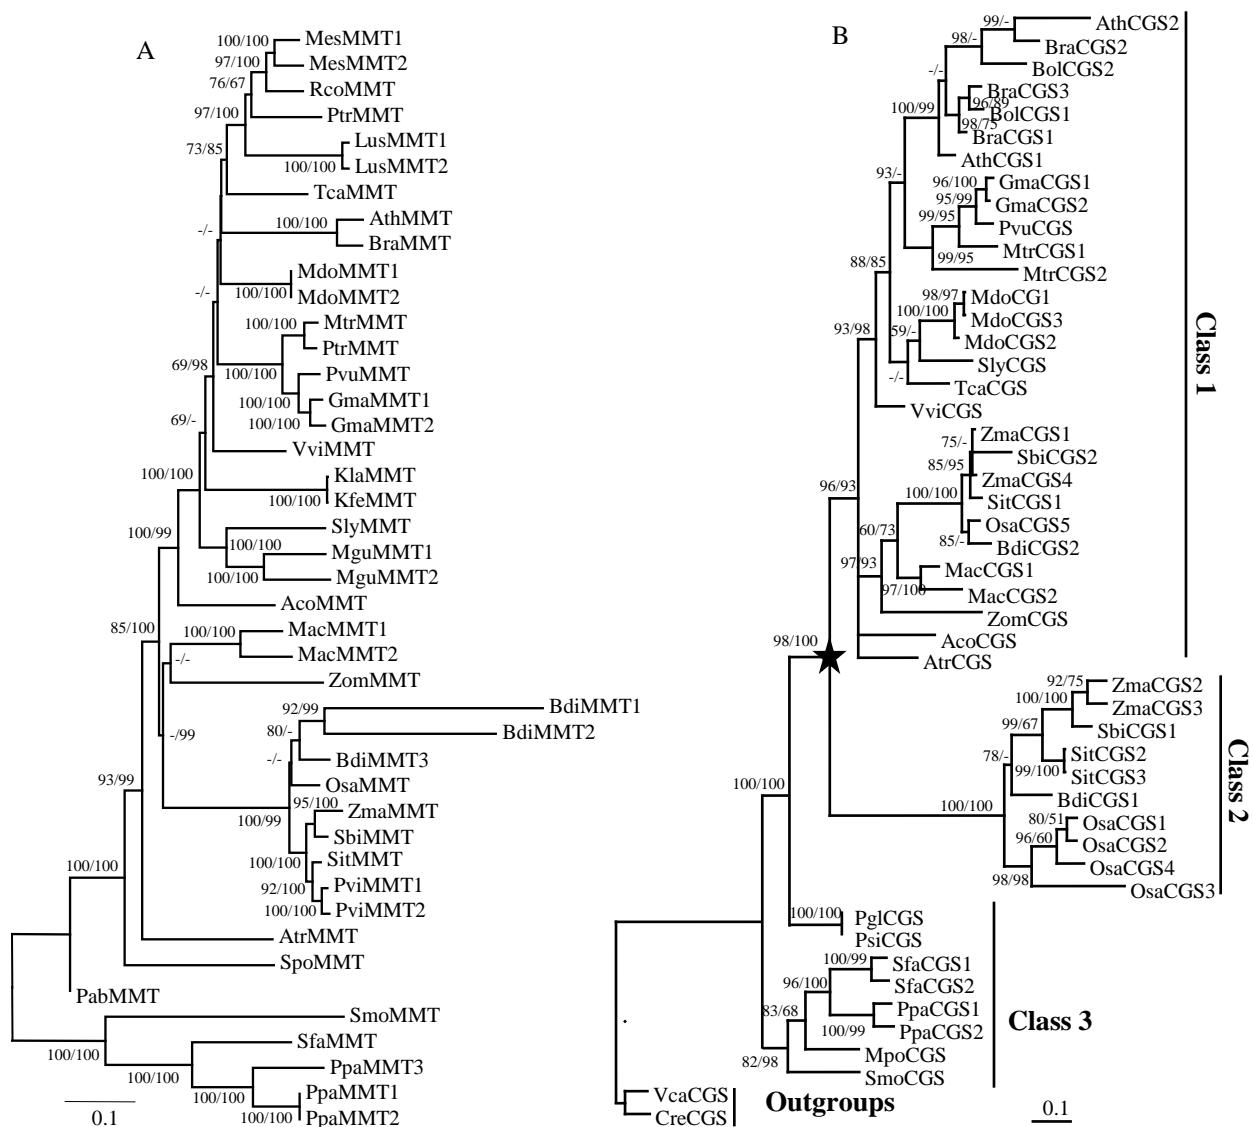

Figure S1 Phylogenetic tree of the *MMT* (A) and *CGS* (B) gene family in plants. The trees were constructed with maximum likelihood (ML) and neighbor-joining (NJ) methods based on the amino acid (aa). Support values (>50% of ML and NJ) for the two trees are shown on respective branches. The black star indicates the divergence of Class 1 and Class 2. Gene names and identifiers are shown in Table S1A,B.

Figure S2

Zhao et al. 2018

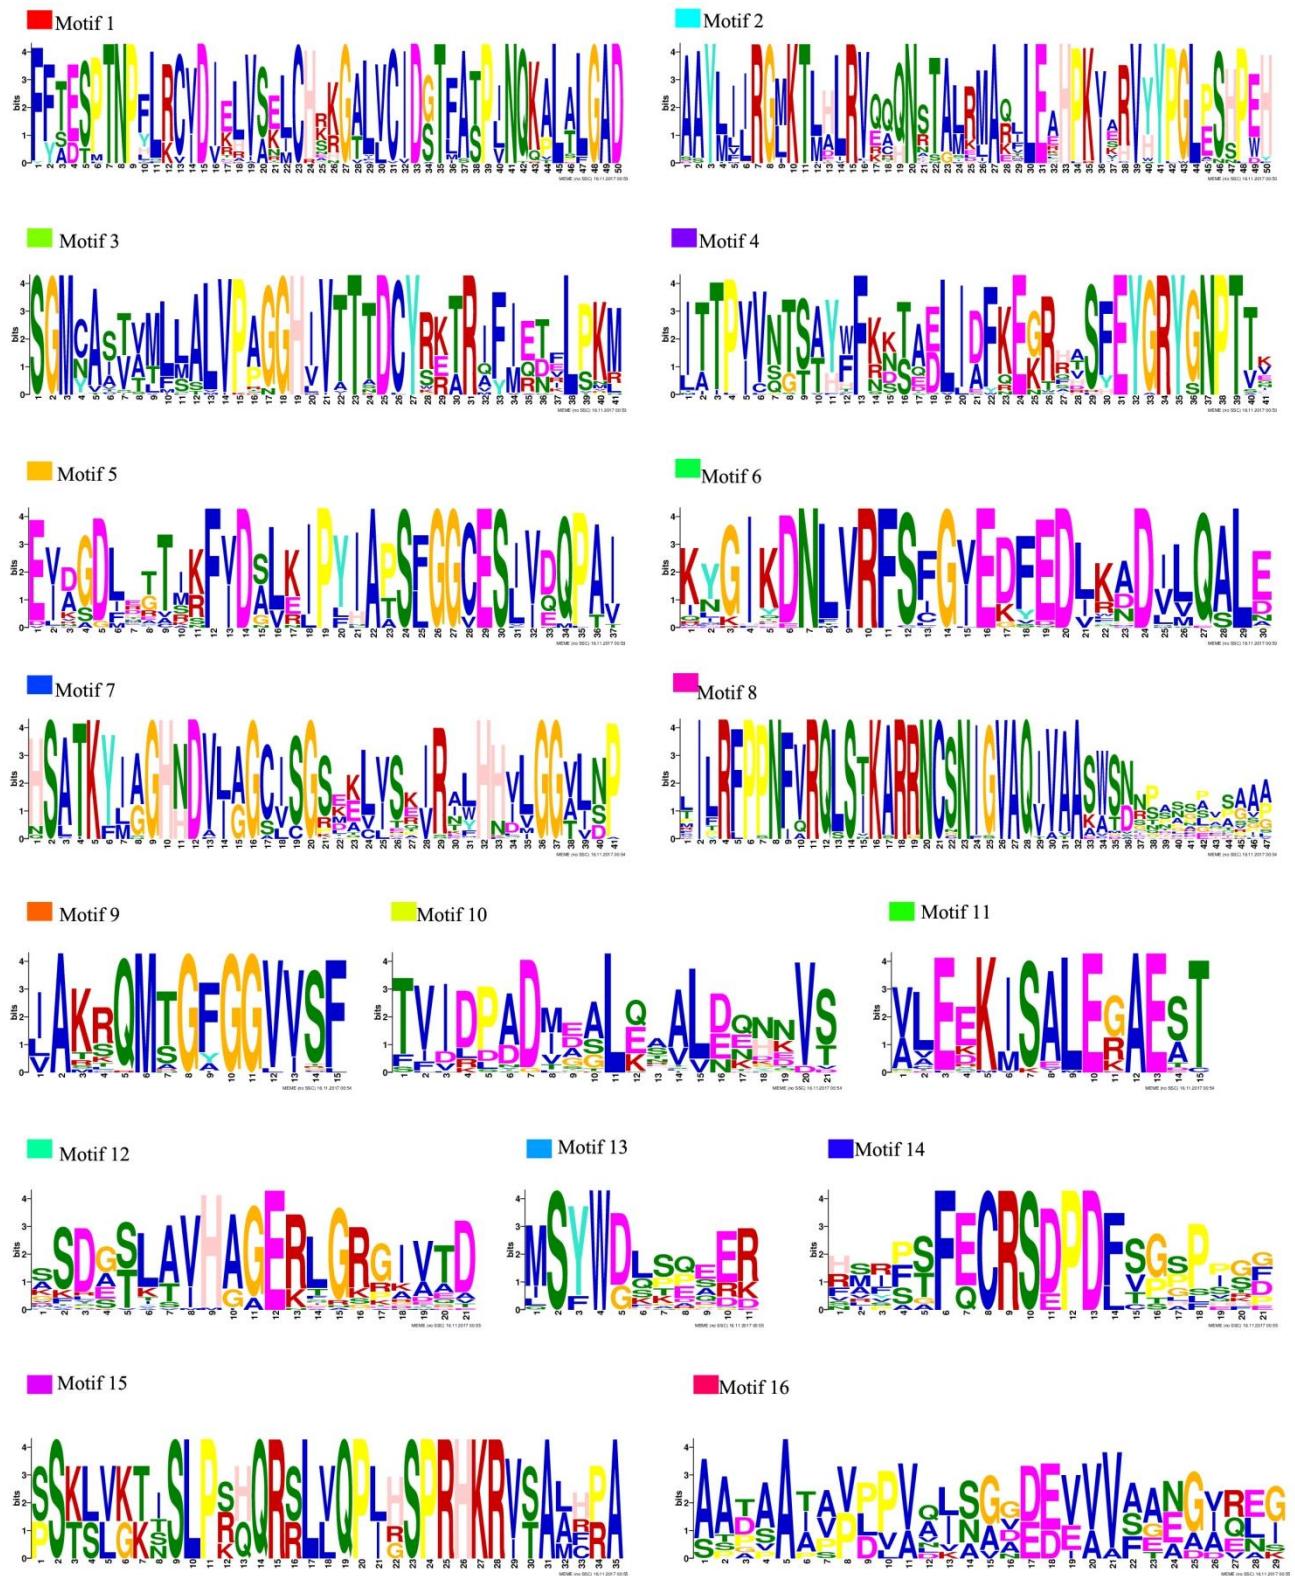

Figure S2A. Sequences of the conserved motifs detected by the MEME analysis on the CGS homologs across plants. The height of the each letter denotes the probability of the letter at that position, and total height of the stack represents the information content of that position.

Figure S2

Zhao et al. 2018

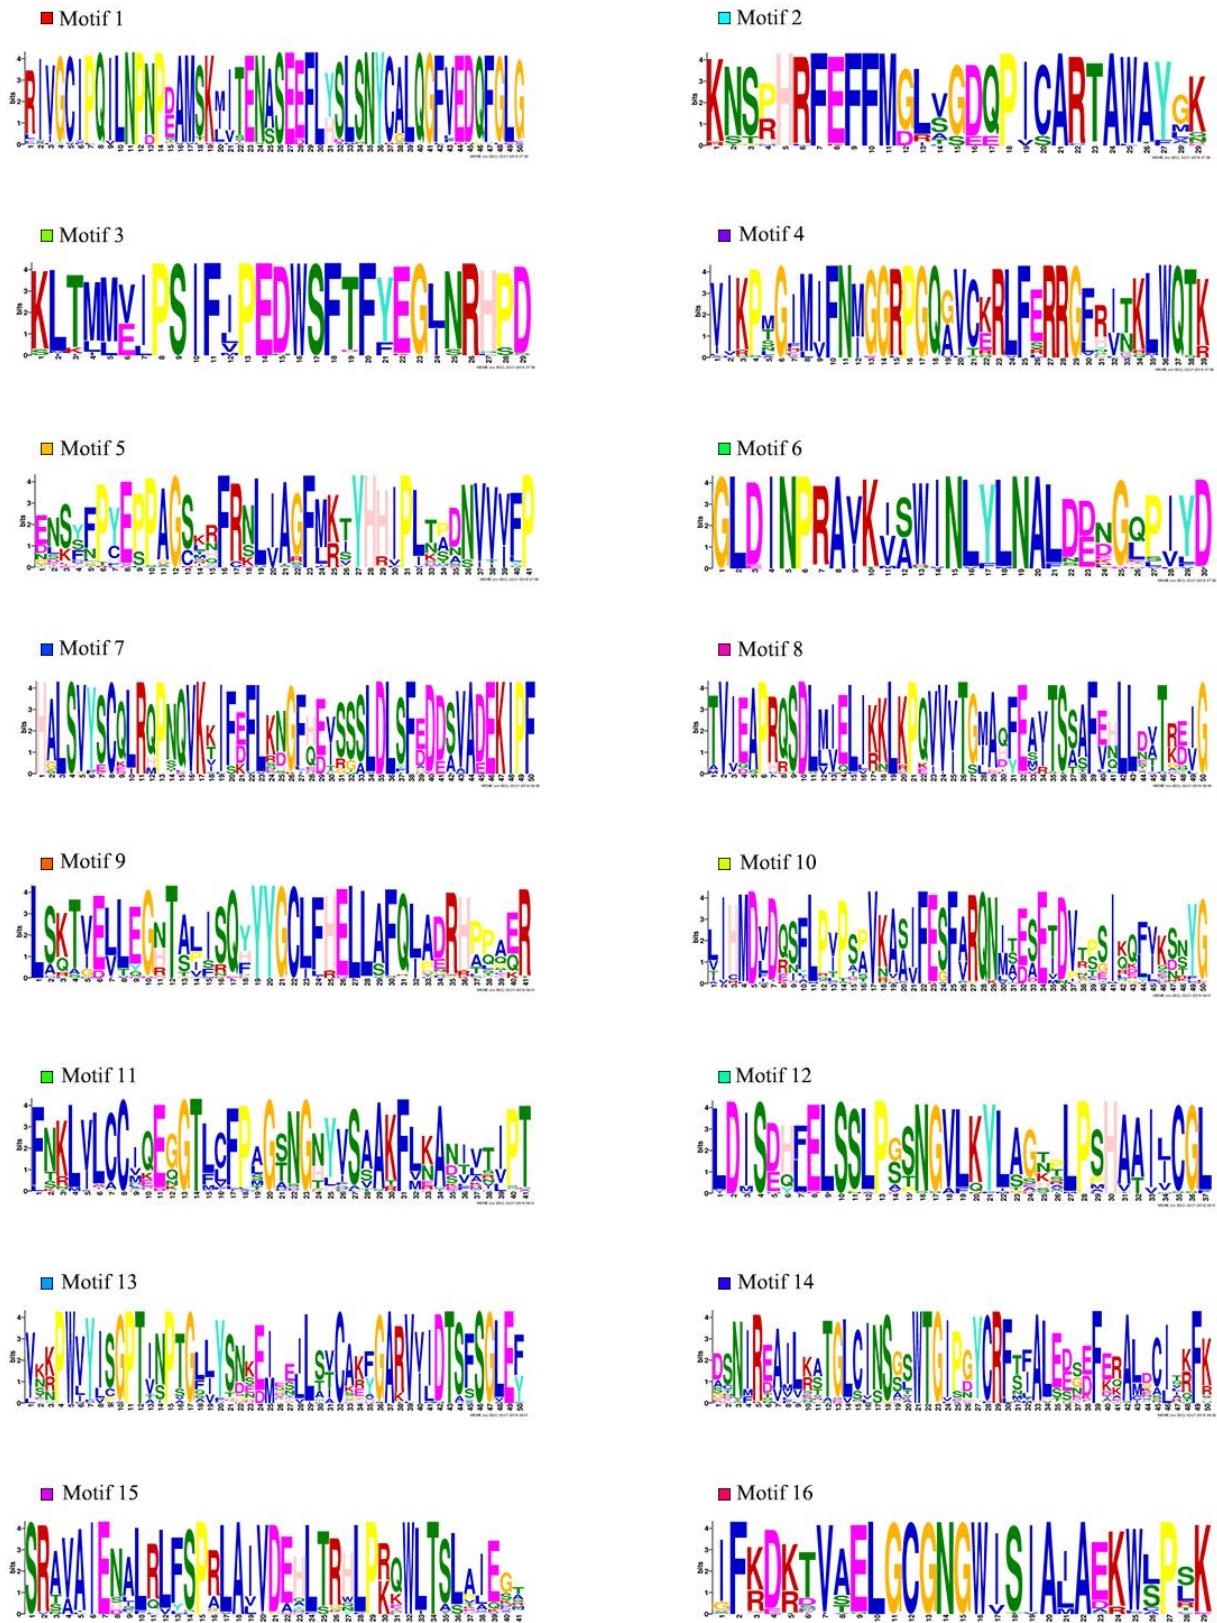

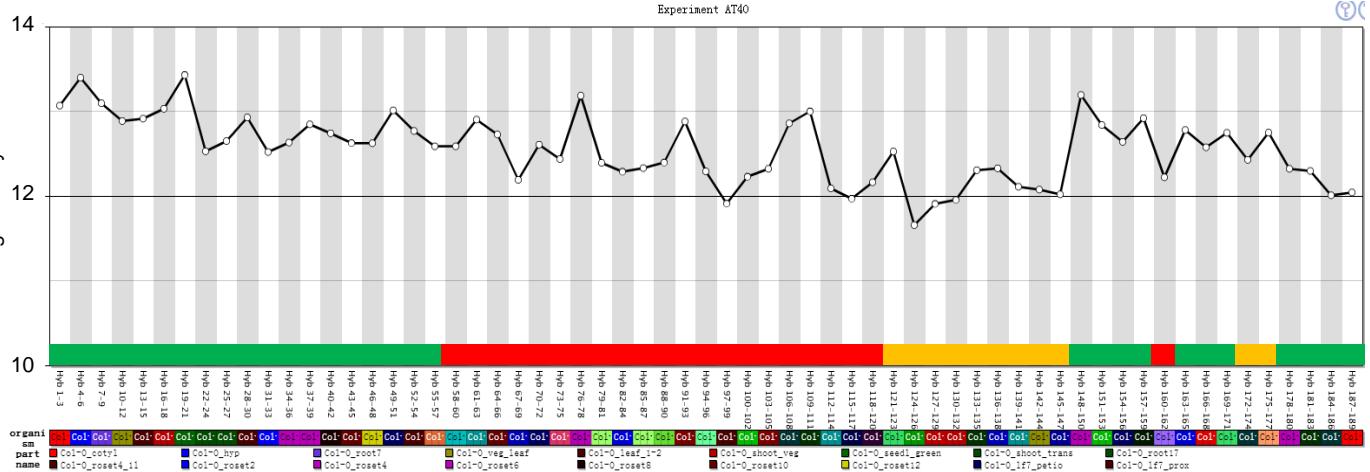

Figure S2B. Sequences of the conserved motifs detected by the MEME analysis on the MMT homologs across plants. The height of the each letter denotes the probability of the letter at that position, and total height of the stack represents the information content of that position.

AthCGS2

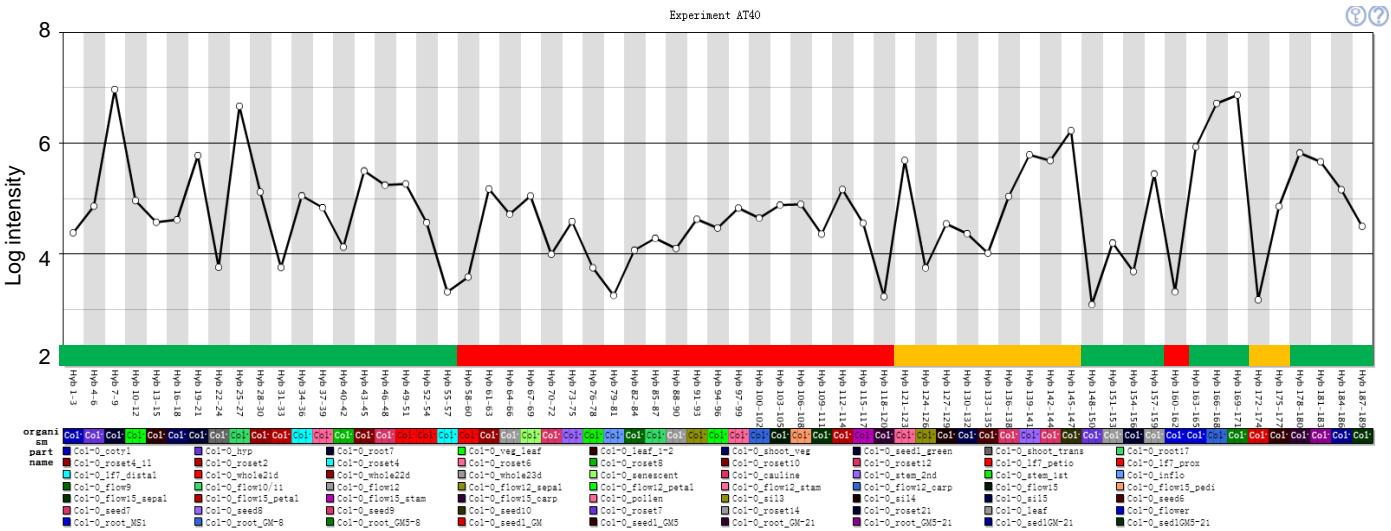

Figure S3A. Tissue-specific expression data of *AthCGSs* from PLEXdb.

The green, red, orange boxes represent vegetative tissues such as roots, stems and leaves, flowers, and seeds, respectively.

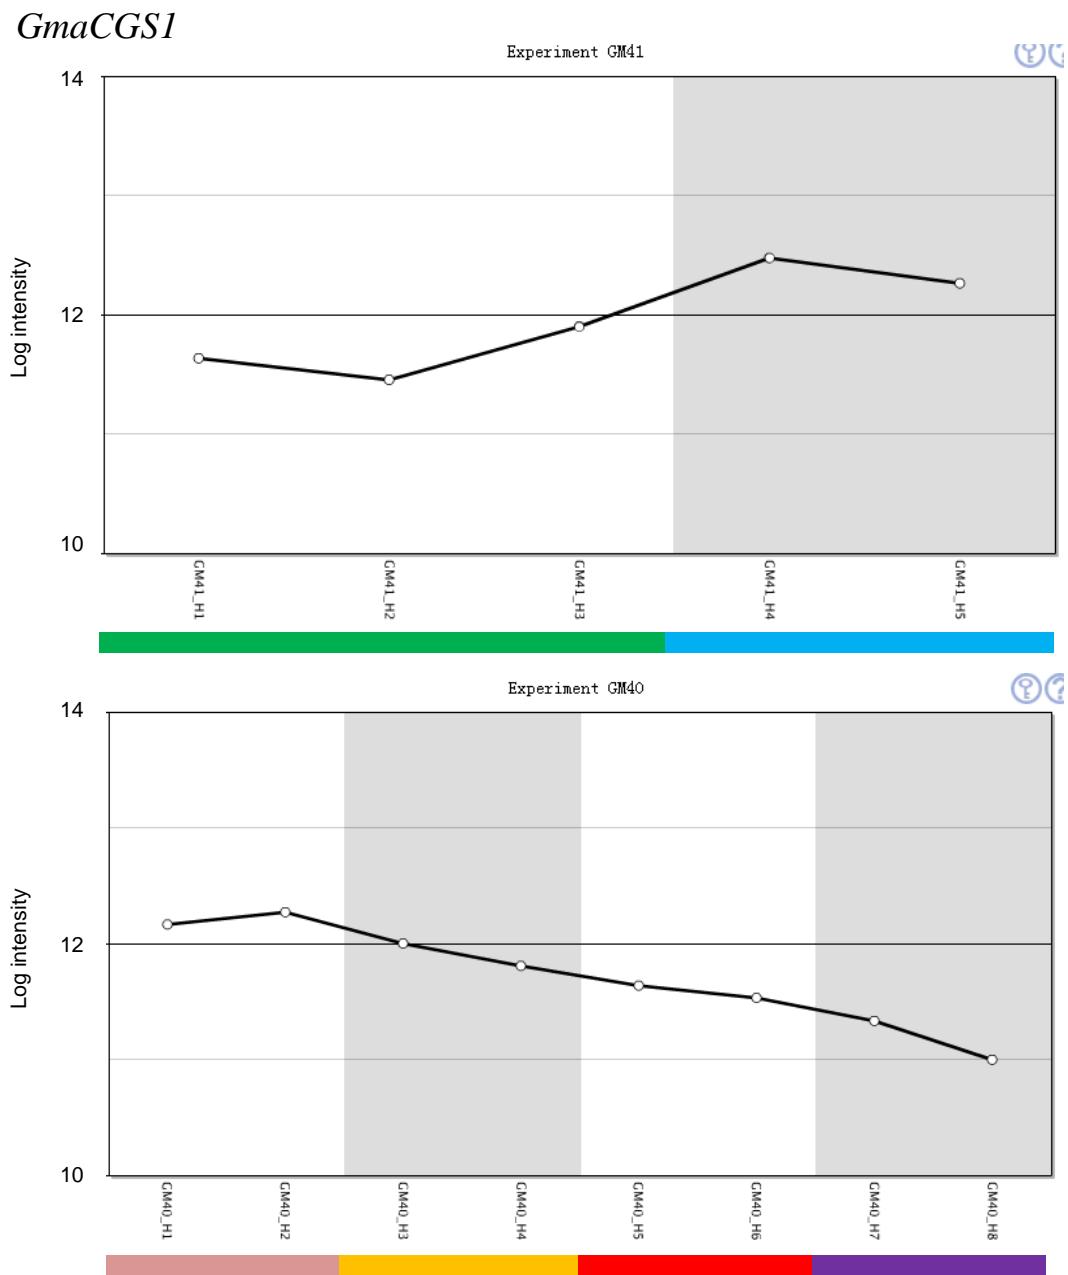

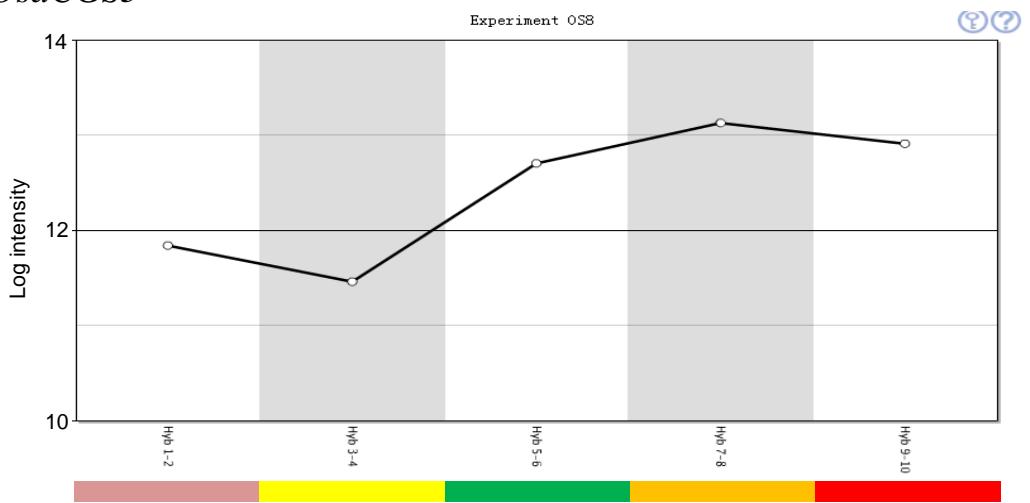

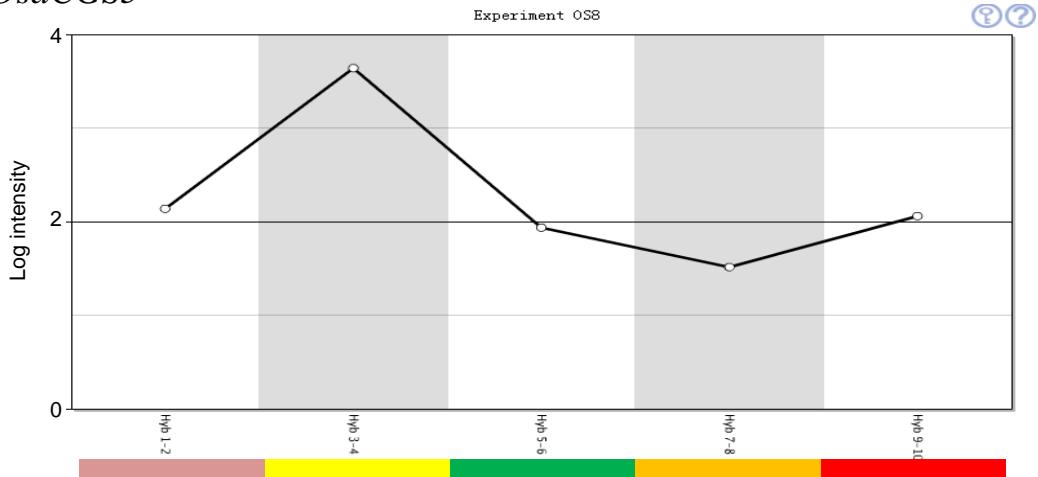

Figure S3B. Tissue-specific expression data of *GmaCGS1* from PLEXdb.

The green and blue boxes represent root apical meristem and leaf non-meristem. The pink, orange, red and purple boxes represent bean 2mm, bean 5mm, pod elongation and fully grown, respectively .

OsaCGS1*OsaCGS3**OsaCGS5***Figure S3C. Tissue-specific expression data of *OsaCGSs* from PLEXdb.**

The pink, yellow, green, orange and red boxes represent emb6D, endo6D, leaf, root and seedling, respectively.

Figure S4

Zhao et al. 2018

AthMMT

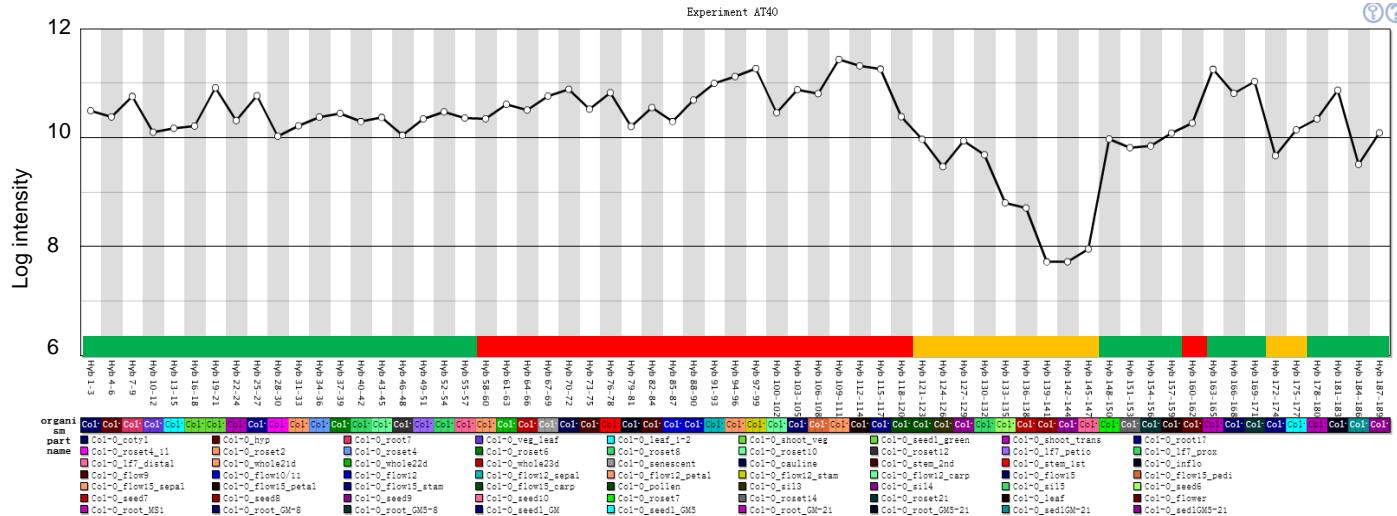

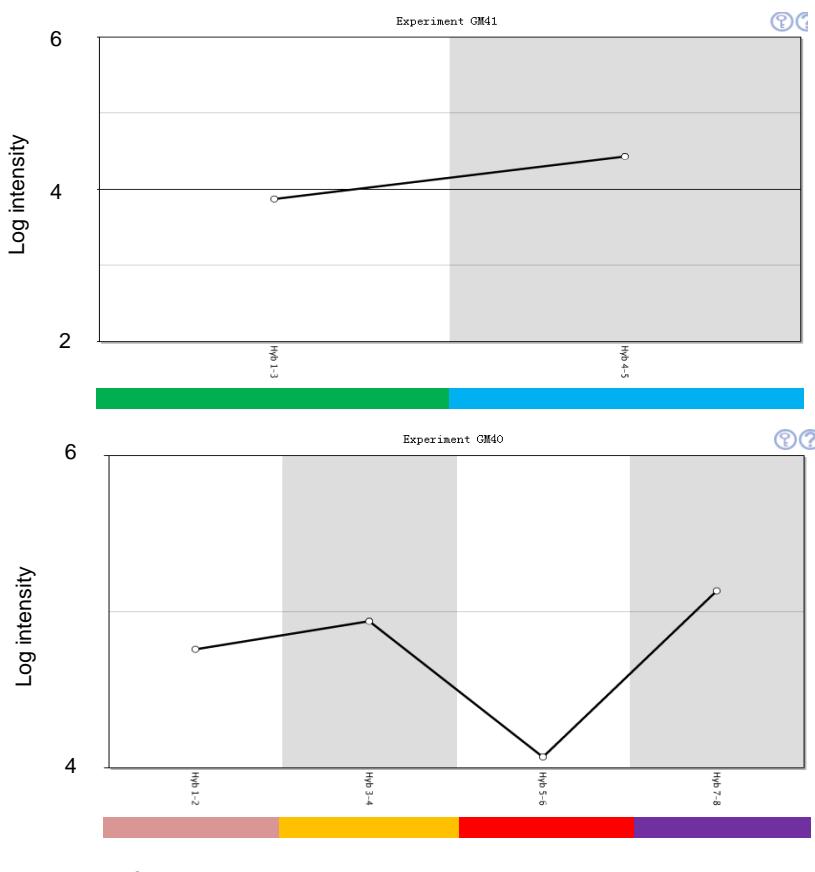

Figure S4A. Tissue-specific expression data of *AthMMTs* from PLEXdb.

The green, red, orange boxes represent vegetative tissues such as roots, stems and leaves, flowers, and seeds, respectively.

Figure S4
GmaMMT1

Zhao et al. 2018

GmaMMT2

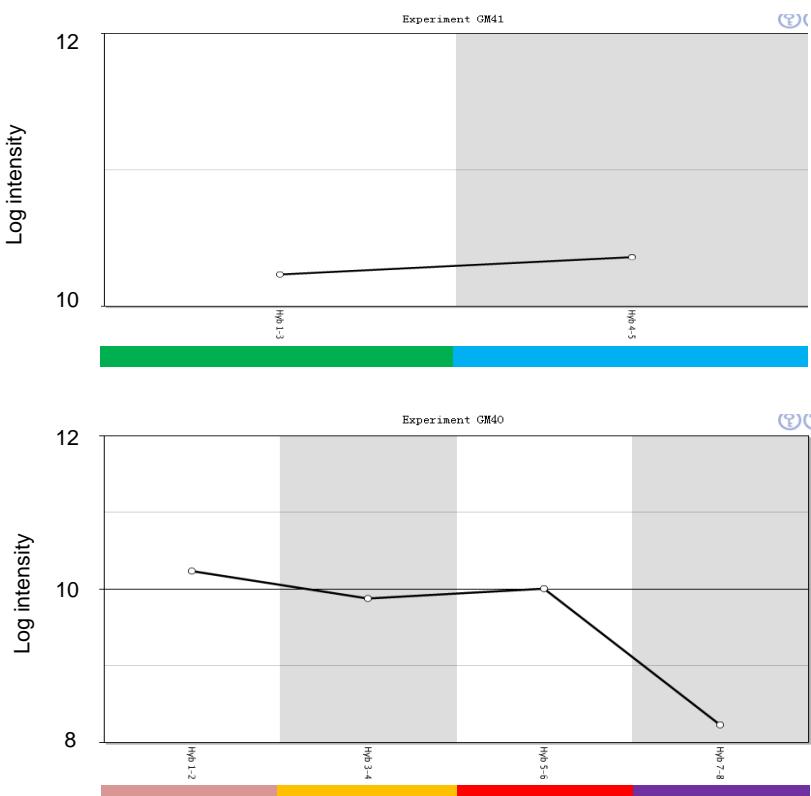

Figure S4B. Tissue-specific expression data of *GmaMMTs* from PLEXdb.

The green and blue boxes represent root apical meristem and leaf non-meristem. The pink, orange, red and purple boxes represent bean 2mm, bean 5mm, pod elongation and fully grown, respectively .
