Para: Bergmann Ribeiro <bergmann.ribeiro@gmail.com>

Dear Dr. Ribeiro,

Thank you very much for sending the Taxonomy Proposal proposing a new species in the family Betaflexiviridae. My initial assessment of the proposal is positive. I have forwarded it to the chair of the Beta-, Delta- and Gammaflexiviridae Study Group, Dr. Ioannis Tzanetakis, for further analysis. He will contact you in case there's anything to be revised. Otherwise, the TP will be considered during the upcoming 51th meeting of the ICTV Executive Committee.

Thank you again for your interest in viral taxonomy.

Best regards,

Murilo

Dear Professor Murilo Zerbini,

I am sending you a taxonomic proposal for a new plant virus found in garlic plants. Attached to this message is an Excel file and a link for the taxonomic template. Could you please acknowledge receipt of this email, since I am submitting a manuscript to PeerJ and they require this information.

Sincerely yours,

Bergmann M Ribeiro
