

Supplemental Table 1 Tattoni et al. 2018 Fruit availability for migratory birds: a GIS approach PeerJ

List of birds captured in the 4 ringing stations considered in the manuscript taken from the official report by Pedrini and Spina (2002). For each species is reported the feeding guild according to (Waldenstroem et al 2002) Guilds: A, raptors; B, ground-foraging invertebrate feeders; C, ground-foraging granivores; D, ground-foraging insectivores; E, arboreal insectivores; F, aerial insectivores; G, reed- and herbaceous plant-foraging insectivores; H, shoreline-foraging invertebrate feeders; I, aquatic invertebrate feeders; J, plant-eating species; K, fish-eating species; L, opportunistic feeders. A simplified guild also reported, for the purpose of this paper , that takes into account the feeding behavior during the migration , so some insectivores that rely on berries were labeled as omnivores (Jordano 1982, 1985, Brandle 2002 , Snow and Snow, 1988, Hernandez, 2009, Muller-Schneider, 1983 , Ariel Brunner and Alessandra Gagliardi personal communication). Only Passerines were used in the elaborations.

Species	guild Waldersotm	Simplified guild during migration	Species	guild Waldersotm	Simplified guild during migration	Species	guild Waldersotm	Simplified guild during migration
<i>Ixobrychus minutus</i>	H	Insectivore	<i>Prunella modularis</i>	C	Insectivore	<i>Parus ater</i>	E	Omnivore
<i>Circus cyaneus</i>	A	Raptor	<i>Erithacus rubecula</i>	B	Insectivore	<i>Parus caeruleus</i>	E	Omnivore
<i>Accipiter nisus</i>	A	Raptor	<i>Luscinia megarhynchos</i>	B	Insectivore	<i>Parus cristatus</i>	E	Omnivore
<i>Falco tinnunculus</i>	A	Raptor	<i>Luscinia svecica</i>	B	Insectivore	<i>Parus major</i>	E	Omnivore
<i>Falco columbarius</i>	A	Raptor	<i>Phoenicurus ochruros</i>	D	Insectivore	<i>Parus montanus</i>	E	Omnivore
