

Raw data

Table 1. *Agrobacterium rhizogenes*-mediated transformation of *Pisum sativum* cv. Frisson

	Total amount of plants	Number of transformed composite plants*	Total number of hairy roots	Number of hairy roots per transformed composite plant
<i>Agrobacterium rhizogenes</i> Arqua1	114 (10) **	80 (10)**	130	1,6
<i>Agrobacterium rhizogenes</i> AR1193	62 (5)**	50 (5)	88	1,8

*Transformed composite plants that gave rise to at least one hairy root per plant.

**The number of independent experiments is indicated within brackets
