A coefficient of variation graph is shown with the x-axis labeled as "Distance from splice site (nt)" ranging from -50 to 50. The y-axis is labeled "Coefficient of Variation" ranging from 0.05 to 0.15. The graph is divided into two parts, A and B. Part A shows curves labeled with 'K' as 3, 6, 9, 12, and 15. These curves correspond to different distances from the splice site, indicated by the labels 5' ss, 25, 50, and 3' ss. Part B shows similar curves with the same labeling but possibly with different data or conditions.
