

Supplementary material

Table S1. Estimates of abundance and concentration of food particles expressed as particles L⁻¹ (*Cyclops*, *Artemia* and *Mysis*) in 10L aquaria. Concentrated food was previously resuspended in 40mL of seawater. Sample size = 3mL, N = 6.

	Abundance	SD	SE	Density
<i>Cyclops</i>	915	79	32	91.5
<i>Artemia</i>	35	13	5	3.5
<i>Mysis</i>	17	5	2	1.7
