

Supplemental Code S1

Formulae used in R (version 1.1.383) (R Development Core Team 2013) to assess survival for dune thicket shrubs. Survival = logistic regression model (binomial family and logit link function).

Survival	<pre>modS1g <- glm(Survival ~ Firebase * Prefiresize + Site, family = binomial(), data = transform(TSurv, Firebase = factor(Firebase, ordered = T)))</pre>
