

Fig S2. Lack of effect of NSC-87877 (NSC) and JTT-551 (JTT) at 100 μ M on level of pSTAT1.

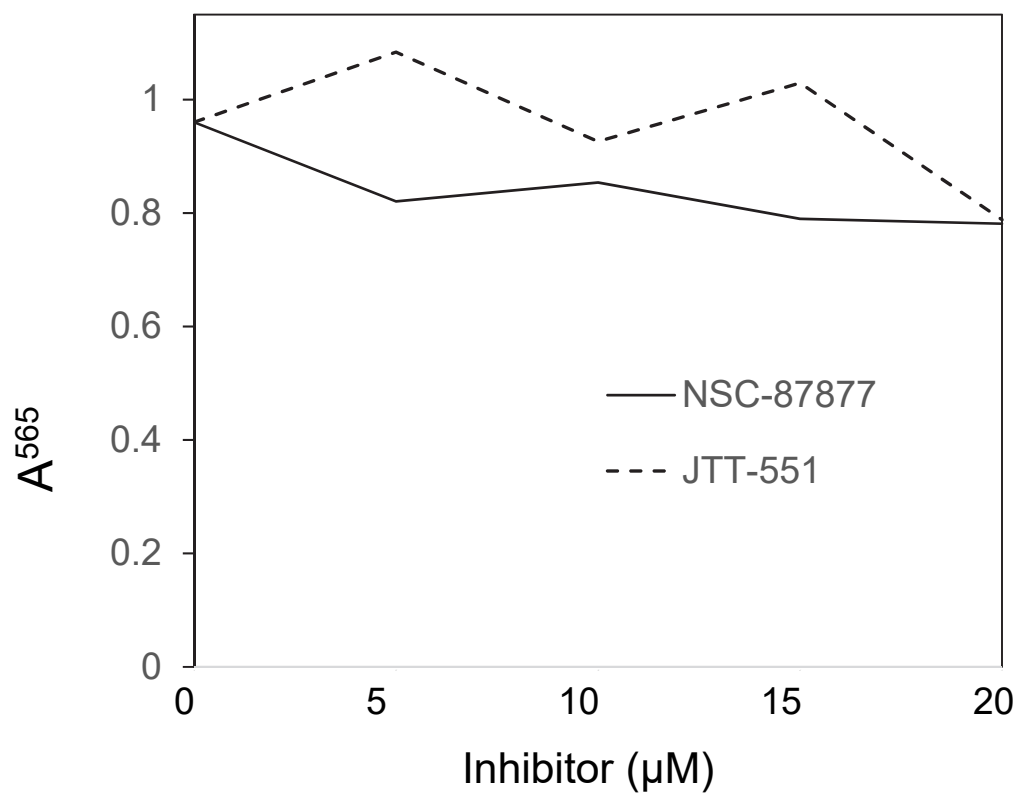

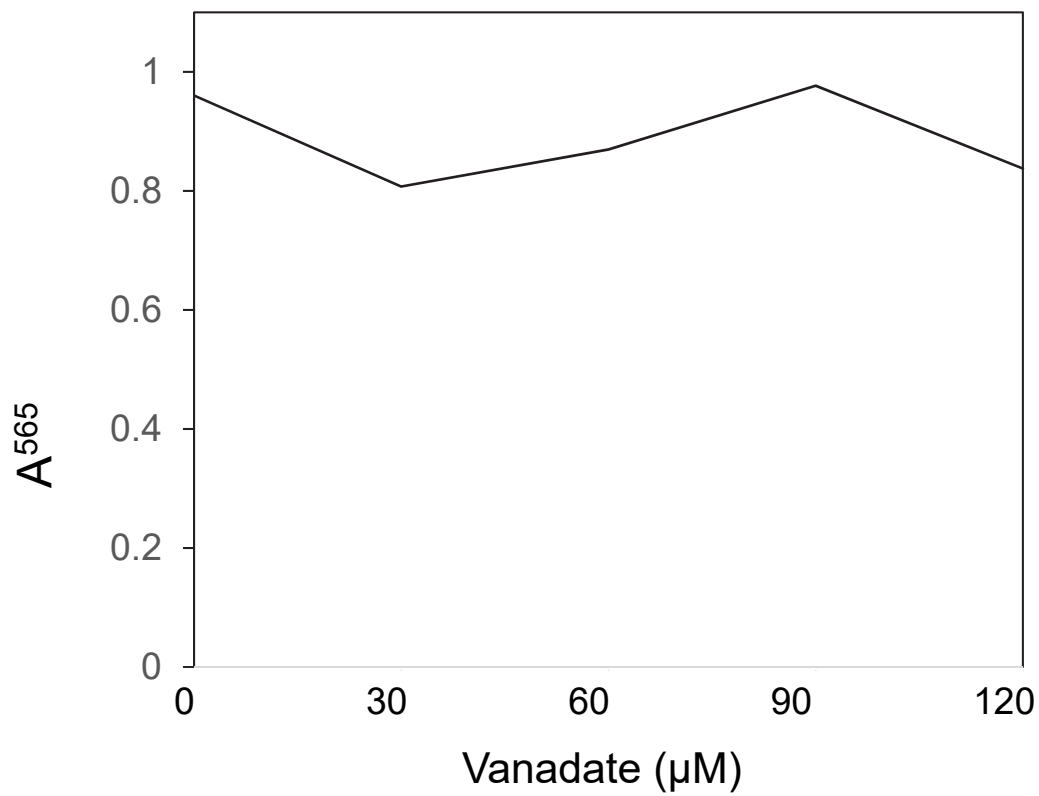

Figure S4. Lack of effect of phosphatase inhibitors on ionophore-induced envelope formation. Cultures were treated for 2 hr. Envelopes were induced by treatment with X537A (70 μM) and the envelope protein was quantitated with bicinchoninic acid (A^{565}).
