

Figure S5. Schematic representation of the motifs contained in the NBS domain of the avocado CC-type NLR proteins. Schematic representation of the motifs contained in the NBS domain of the avocado CC-type NLR proteins. The consensus sequence of each of the highly conserved motifs in the NBS domain (P-loop, kinase, RNBS, GLPL, MHD; (Van Ghelder et al., 2019) was graphically displayed with WebLogo (Crooks et al., 2004) using small-sample correction (Schneider et al., 1986).
