

Supplement data

1. miR-195-5p and mimic: PhalanxBio Inc.

- miR-195-5p conc. 5nmol/ml/kg

2. Antibody:

iNOS: BD biosciences, 610329

eNOS: BD biosciences, 610279

NF-κB:proteintech, 10745-1-AP

p-NF-κB: cell signaling, 3033

Beta-actin: Sigma, A5441

3. Image assay software: ImageJ, NIH.

4. Analysis software: SPSS

5. Target Site Prediction

The miR-195-5p sequence was obtained from miRBase database (<http://www.mirbase.org/>), and miR-195-5p targets were performed by screening the databases: miRDB (<http://mirdb.org/index.html>), microR.org (<http://www.microrna.org/>) and miRWALK (<http://mirwalk.umm.uni-heidelberg.de/>). Then, from the list of mRNAs predicted to be targeted by miR-195-5p, the interaction with IKK α was specifically analyzed.

961	5'	ttatttTGCTGCTtgatgat.....3'	IKK α
3'	UAGCAGCACAGAAAUUUGGC	5'	has-miR-195-5p

The data were expressed as mean \pm standard error of the mean and illustrated using GraphPad Prism software (version 8.0; GraphPad, Inc., La Jolla, CA, USA). Differences between the experimental groups were analyzed by one-way ANOVA was utilized, followed by a Tukey's post hoc test. (IBM SPSS Statistics, version 24.0; IBM Inc., Armonk, New York, USA). A p-value of < 0.05 was considered significant. All statistical operations were performed using.
