

Figure S2. Typical symptoms on the leaves of chrysanthemum cultivars Fiji Yellow (**a**), Ribonette (**b**), Golden Standard (**c**), Chita (**d**), Yunost (**e**), and hybrid 7-15 (**f**). Samples **a - d** and **f** are co-infected with chrysanthemum virus R (CVR) and chrysanthemum virus B (CVB); **e** - no CVR and CVB were detected.
