**Table S3. Procrustes ANOVA on shape, without the exclusion of outliers of type 2).** We applied the following crossed structure: System × Operator × Specimen. Residuals reflect landmark replica. The R-squared values (Rsq) give estimates of the relative contribution of each factor to total shape variation.

| Variables | Df | MS | Rsq | F | Pr(>F) |
|---|---|---|---|---|---|
| System | 1 | 0.00033 | 0.0003 | 1.266 | 0.229 |
| Operator | 3 | 0.00542 | 0.0160 | 20.992 | 0.001 |
| Specimen | 5 | 0.18340 | 0.8997 | 710.075 | 0.001 |
| System:Operator | 3 | 0.00039 | 0.0012 | 1.515 | 0.050 |
| System:Specimen | 5 | 0.00031 | 0.0015 | 1.203 | 0.159 |
| Operator:Specimen | 15 | 0.00113 | 0.0166 | 4.364 | 0.001 |
| System:Operator:Specimen | 15 | 0.00027 | 0.0040 | 1.040 | 0.364 |
| Residuals | 240 | 0.00026 | 0.0608 | | |
