

Table S7. Summary of SIMPER results for parrotfishes biomass data collected in 2018.

Average abundance (estandardized biomass) of species between location were significant differences were found, the average dissimilarity (Av.Diss), their contribution (Contrib%) to the within-group dissimilarity, and the cumulative total (Cum.%) of contributions (90% cut-off). Sex is detailed in the corresponding SIMPER summary (M: Males; F: Females)

Locality	SPECIES BIOMASS 2018
