

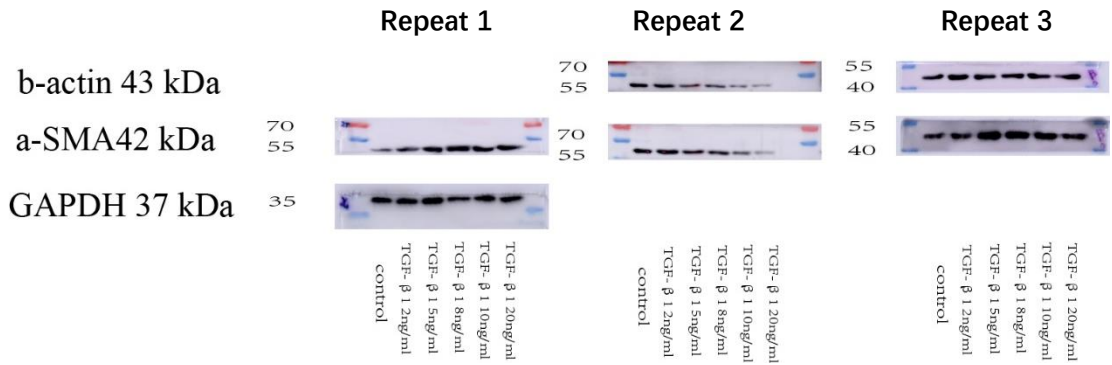

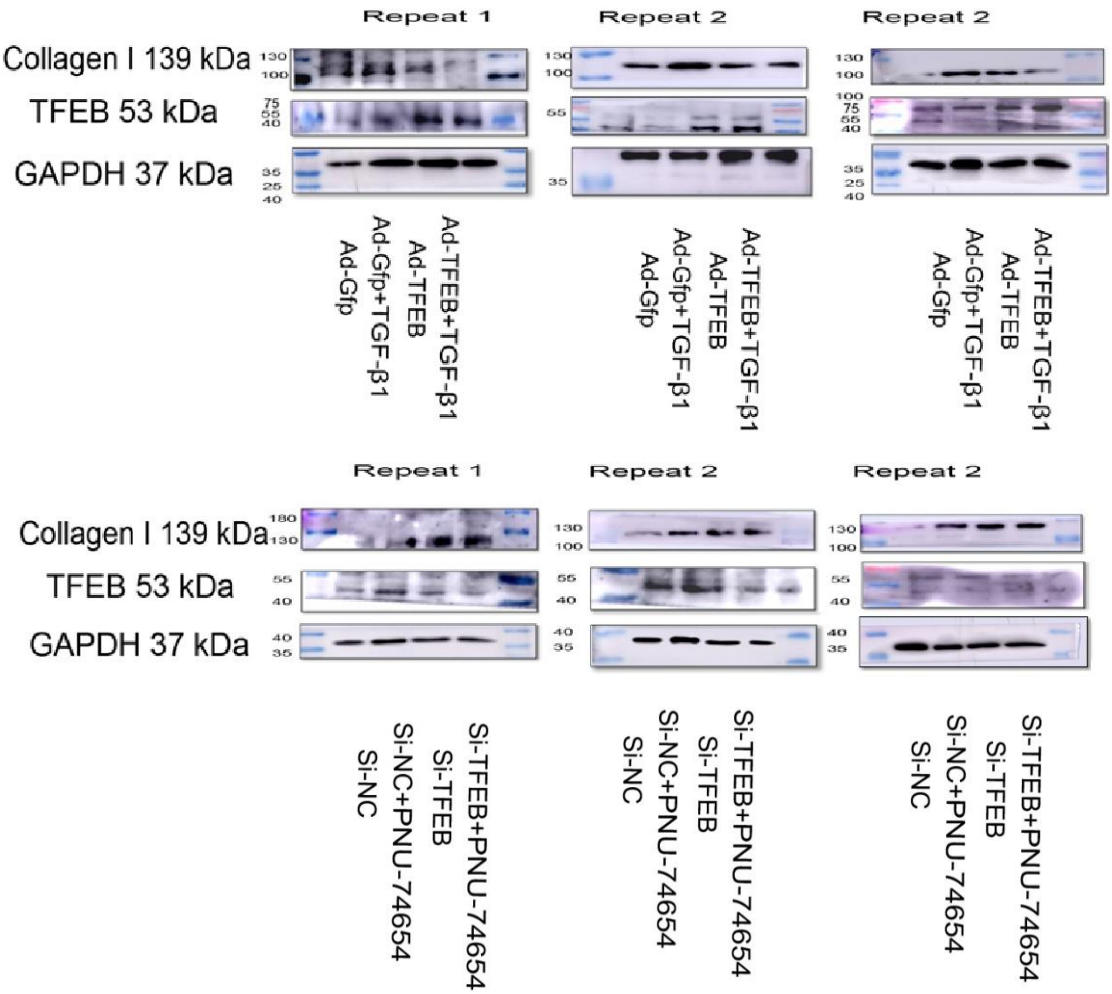

Figure3.

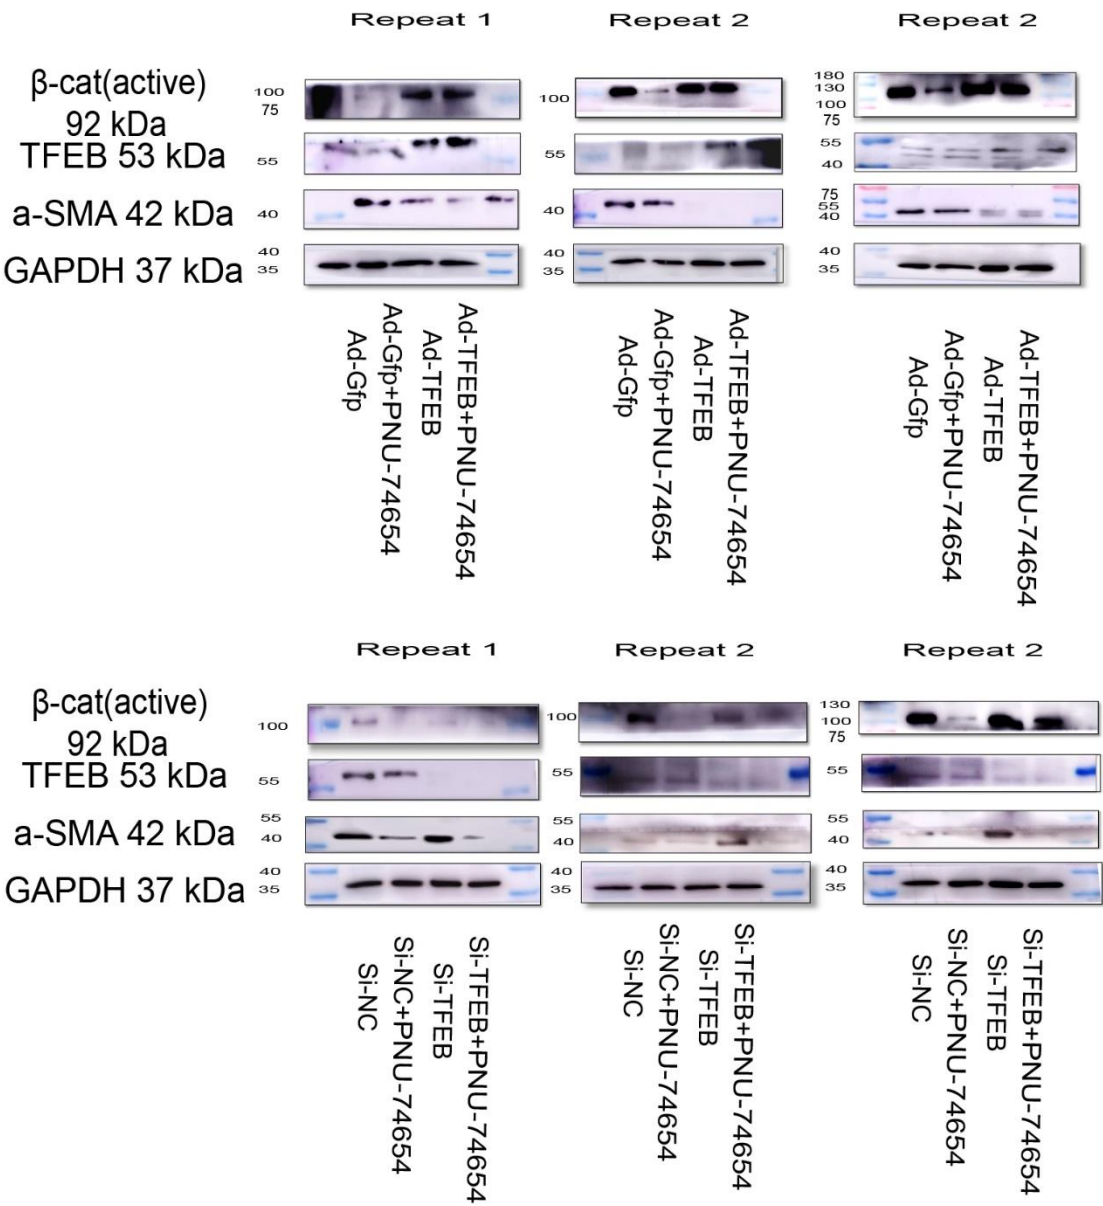

Effects of TGF-β1 of different concentrations and incubation time on the expression of α-SMA was detected using Western blotting.

The expression difference of Collagen I of CFs co-incubated with TGF-β1 (5 ng/mL) for 24 hours was detected using Western blot.

Figure4.

The expression of  $\alpha$ -SMA was detected using Western blotting. PNU-74654 (100 ng/mL) was used to for 12 hours to inhibit  $\beta$ -catenin-TCF/LEF1 complex.
