

Clarification on the Source of Body Chart Used in Questionnaire

Dear Sir and Madam,

The body chart featured in my questionnaire is not an original diagram from the Nordic Musculoskeletal Questionnaire (NMQ). However, following the participant's selection on the body chart, I utilized the NMQ diagram as a guideline to record pain areas. The image in the questionnaire was obtained from TemplateRoller.com, a website offering resources for general and educational purposes. At Templateroller.com, all resources are offered completely free of charge. Users can download, print, and edit any content according to their preferences and needs. Please find the URL below for access to this image:
